TO APPLICANTS

(Project Sponsor)

The County of Saratoga Industrial Development Agency was established by special act of the New York State Legislature in 1971.

Industrial Development Agencies were first legally authorized in 1969 when the New York State Legislature added a new Article 18-A to the General Municipal Law to provide for the establishment, by special act of the legislature, of local industrial development agencies as public benefit corporations.

Once established, a local industrial development agency is authorized to issue "taxable" industrial revenue bonds for the purposes of acquiring machinery, equipment, and other facilities deemed necessary or desirable in connection therewith, or incidental thereto, whether or not now in existence or under construction, which shall be suitable for manufacturing, warehousing, research, commercial or industrial purposes. Projects may also be financed through a "Straight Lease" transaction which may entail a conventional mortgage or other form of private financing.

Industrial Development Agencies offer attractive incentives to industry seeking new locations or expansion of existing facilities. The advantages to a business in financing a project through the Agency are substantial in providing the following:

- The project is exempt from real property taxes during the term of the bond issue and lease agreement. However, each
 project shall be required to enter into an agreement to pay a negotiated sum in lieu of taxes.
- Project related construction purchases and rentals as well as equipment purchases are exempt from state and local sales
- A mortgage given by the Agency to secure project-related indebtedness is exempt from the state mortgage recording tax.

Section IV Inter-Municipal Move Determination

The Agency is required by state law to make a determination that, if completion of a Project benefiting from Agency Financial Assistance results in the removal of an industrial or manufacturing plant of the project occupant from one area of the state to another area of the state or in the abandonment of one or more plants or facilities of the project occupant located within the state, Agency Financial Assistance is required to prevent the project occupant from relocating out of the state, or is reasonably necessary to preserve the project occupant's competitive position in its respective industry.

If Yes to either question, please, explain: G&G tried, unsuccessfully, to expand at their current location. They then explored other sites in Halfmoon to no avail. At that point, they began receiving information to relocate out of the State as options and explored sites.. The NYSERDA property was pitched as an option and with the incentives, it makes it feasible for G&G to expand and stay in Saratoga County. Therefore, retaining 40 positions and situating them to increase FTEs here.

LABOR POLICY

Saratoga County Industrial Development Agency Declaration of Motivation For the Employment of Local Tradespeople During the Construction Phase of IDA-Benefited Projects

The County of Saratoga Industrial Development Agency (IDA), formed pursuant to Section 856 of the New York State Industrial Development Act (the "Act"), was created for the purpose of promoting employment opportunities for and the general prosperity and economic welfare of Saratoga County residents. The IDA is authorized by Section 858 of the Act to enter into agreements requiring payments in lieu of taxes ("PILOT Agreements") with private companies in order to facilitate the location or the expansion of their property and other taxes to private companies participating in IDA programs.

Construction jobs, although limited in time duration, are vital to the overall employment opportunities within Saratoga County since construction wages earned by local residents are reinvested in the local economy, adding greatly to its vitality. It is the IDA's strong conviction that companies benefiting from its programs should employ New York State residents during the construction phase of projects. Only in that way can the public benefits accruing from the IDA's efforts be maximally distributed to the residents and IDA's mission to promote employment opportunities during all project phases, including the construction phase.

The IDA hereby declares its right to request companies benefiting from its programs to engage Saratoga County residents in and during the project construction phase through the addition of an amendment to the IDA project application requiring applicants, prior to and during the construction phase of the development project, to:

- 1. Identify the name, title, mailing address, phone/FAX/E-Mail of the project contact person who will be responsible and accountable for providing information about the bidding for and awarding of future construction contracts relative to the application and project.
- 2. Describe, in the best way possible, the nature of construction jobs created by the project. The description should provide as much detail as possible, including the number, type and duration of construction positions.
- 3. Submit to the IDA a "Construction Completion Report" listing the names and business locations of prime contractors, subcontractors and vendors who have been engaged for the construction phase of the project by companies benefiting from IDA programs.

In turn the IDA will:

- 1. Post all applications approved for a public hearing to its web site (www.saratogacountyida.org) within two business days of such authorization.
- Following the public hearing and after Agency approval has been granted for an inducement resolution, the website will be promptly updated for all current data.
- 3. Reserve the right to modify and/or rescind benefits granted to any company under the IDA's Uniform Tax Exemption Policy for the failure to comply with any of the provision listed herein.
